## Coaster to Coaster

By Dorothy Creamer, Editor

Coasters have become the new go-to add-on item for paper companies. These small discs or squares combine form and function by both serving a purpose and being another way for designers to express themselves on a different medium.

Gilah Press has introduced its Buzzkill Coasters. They are sold in sets of six and measure 4 inches in diameter. There are six unique coasters per set and retail for \$3. For more information, visit [www.gilahpress.com](http://www.gilahpress.com).
